

Integrated Quality and Environment Policy Statement

For the continued operation of the Albacomp Group for its continued operation, the provision of high quality products and services, which is with modern technology that respects the environment as a whole. The basic principle of our Integrated quality and environmental policy is:

"High quality work carried out with environmentally friendly technology is the guarantee of customer confidence."

Our aim is therefore to inspire confidence in our daily work, and to build this confidence, thus retaining our customers and attracting new ones. In terms of quality, the quality objectives we have set for ourselves, at all levels of management and execution, is to consider it our daily task to prevent the pollution of the environment, to carry out quality work, using environmental resources to the optimum and to the best of our ability, applying the highest possible technical standards. Customer satisfaction guides all our actions, which is why integrated management, operating harmoniously at all levels, is the key to all levels to meet and exceed the expectations of our Customers, with quality products and services, in accordance with the terms of our contracts and all deadlines are in accordance with our contracts. The Group continuously follows the national environmental and professional legislation and requirements, taking into account European Union directives, establishes good cooperation with the authorities, for effective, recognised legal and regulatory compliance requirements. For the future safety and security of the Group and the well-being of our employees, we consciously strive to ensure the technical quality of our services and products, - to continuously monitor and if necessary to reduce their impact on the environment, to save materials and reduce the amount of waste generated, following the principles of recycling and reuse. With the ensuring of the efficient use of the necessary and sufficient resources, we aim to improve the quality awareness, commitment to environmental protection and environmental sensitivity of our employees, thus creating a harmonious balance between our activities and the environment. We regard it our key task to make all our employees to understand the Group's integrated quality and environmental policy and actively support its implementation, as well as to use their expertise and to contribute to the continuous improvement of the integrated management system. We are committed to professionalism and to the development of the integrated management system. To this end, we ensure professional and environmental training, set measurable targets and measure these on a regular basis, to verify the satisfaction of our customers and the effectiveness of the integrated management system. Ensuring the quality of our products and services we expect our suppliers and subcontractors to be committed to the quality of our products and services, together with the respect for our principles of quality and environmental protection and to meet our expectations in this regard. In order to achieve the above considering the MSZ EN ISO 9001 and MSZ EN ISO 14001 standards, we have developed an integrated management system to ensure quality-oriented and environmentally friendly operations, in order to meet the quality requirements of our customers for the necessary improvement of material, financial, professional and human resources.
